

## Project Design Phase

### Problem – Solution Fit Template

Date	9 Feb 2026
Team ID	LTVIP2026TMIDS60231
Project Name	ToyCraft Tales: Tableau's Vision into Toy Manufacturer Data
Maximum Marks	2 Marks

#### Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

#### Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

#### Template:

#### Problem-Solution fit canvas 2.0

**1. CUSTOMER SEGMENT(S)** CS

Who's your customer?  
i.e. working parents of 0-5 y.o. kids

Sales managers and data analysts in toy manufacturing companies

Define CS, fit into CC

**6. CUSTOMER CONSTRAINTS** CC

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.

Lack of time, limited data skills, small budgets, and complex tools

**5. AVAILABLE SOLUTIONS** AS

Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking

Excel sheets and ERP tools, but they're slow and hard to understand

Explore AS, differentiate

**2. JOBS-TO-BE-DONE / PROBLEMS** J&P

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

Understand toy sales, manage inventory, and make better business decisions using data

Focus on J&P, tap into BE, understand RC

**9. PROBLEM ROOT CAUSE** RC

What is the real reason that this problem exists?  
What is the back story behind the need to do this job?  
i.e. customers have to do it because of the change in regulations.

They don't have one easy tool to see all toy data clearly and quickly

**7. BEHAVIOUR** BE

What does your customer do to address the problem and get the job done?  
i.e. directly related: find the right solar panel installer, calculate usage and benefits;  
indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)

They use Excel, ask for help with charts, or guess based on past data

Focus on J&P, tap into BE, understand RC

**3. TRIGGERS** TR

What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.

Drop in sales, stock piling up, or launching new toys makes them look for better data tools

Identify strong TR & EM

**10. YOUR SOLUTION** SL

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.  
If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.

A Tableau dashboard that shows toy sales, stock, and trends in a simple, visual way

**8. CHANNELS of BEHAVIOUR** CH

**8.1 ONLINE**  
What kind of actions do customers take online? Extract online channels from #7

Check dashboards, share reports online

**8.2 OFFLINE**  
What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

Discuss in meetings, write notes, talk to teams

Extract online & offline CH of BE
